Container Energy Storage System (CESS) is a modular and scalable energy storage solution that utilizes containerized lithium-ion batteries to store and supply electricity.

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS).

The \$50 million development in Dominica will support a 5-megawatt/2.5 megawatt-hours battery energy storage system that will aid the island's clean energy objectives.
