Combines high-voltage lithium battery packs, BMS, fire protection, power distribution, and cooling into a single, modular outdoor cabinet. Uses LiFePO4 batteries with high thermal stability, extensive cycle ...

Equinox features a IP54 enclosure, ensuring protection and longevity. It features a wide thermal operating range from -20°C to 50°C. With the optional Winter climate package, it supports ...

? High-Capacity Outdoor Energy Storage for Scalable Applications Key Features: 1075kWh battery storage with 500 kW rated AC output, ideal for commercial and industrial loads. Combines LFP ...

This integrated solar battery storage cabinet is engineered for robust performance, with system configurations readily scalable to meet demands such as a 100kwh battery storage requirement.

IP54-rated enclosure for harsh environments (-30°C to 55°C). Compact footprint (1.28m³; per unit) with stackable configuration. Industrial Peak Shaving: Cut demand charges by 30%+ with automated load ...

Bypass cabinet is designed to be used together with bidirectional battery inverter and PV inverter to realize seamless transfer between on and off grid mode automatically.

It adopts door-mounted embedded integrated air conditioning, which does not occupy cabinet space, improves the available space of outdoor cabinets, has better structural integrity at the ...

This All-in-one cabinet is suitable for microgrid scenarios such as small-scale commercial and industrial energy storage, photovoltaic diesel storage, and photovoltaic storage and charging.
