Note The above data are average values, and can be obtained with 3 charge/discharge cycles. These are not minimum values. This information is generally descriptive only and is not intended to make or ...

If a cell overheats or if the battery is penetrated by a metal object the Lengthway Circuit Board will disconnect the impacted cells allowing the rest of the battery to continue to function normally.

Maxima SUPER CARBON batteries perform almost like SUPER CAPACITOR, offering very high efficiency, long life and high charge and discharge current. The common factor when considering the ...

o Nominal Capacity: 80Ah @ 20hr-rate to 1.75V per cell @ 25°C (77°F) o Maximum Discharge Current: 800A (5 sec) o Internal Resistance: Approx. 4.70 mΩ o Short Circuit Current: 1917A o Maximum ...

SP series VRLA battery uses AGM technology and high-purity raw materials. Its good floating back up and large current discharge performance makes it optimal and economical choice for UPS/EPS.

For the battery that loses electricity due to various reasons during use, it should be charged in time to prevent the performance degradation caused by the sulfation of the battery.

Operating Discharge temperature Charge range Storage Float charging voltage at 25°C Cyclic charging voltage at 25°C Temperature Float charge compensation Cycle charge Max. charging current (A) ...

PERFORMANCE DATA Discharge Constant Current at 25°C (Amperes) ... Discharge Constant Power at 25°C (Watts/Cell) ... Note: The above characteristics data can be obtained within three ...
