Our control technology enables end-to-end automation of all processes in battery manufacturing: from electrode production to module and pack assembly. PC-based control offers advantages for all ...

Immerse yourself into the realm of pack assembly and end-of-line (EOL) testing with our animation, crafted to showcase the custom solutions offered by Bosch Rexroth for battery manufacturing.

Discover the state-of-the-art automated assembly production line system for lithium battery packs, designed for new energy applications. This 16-meter-long production line integrates ...

Learn how we design, build and manufacture custom equipment for processing, handling and inspecting batteries, fuel cells, and solar cells

Custom-built and modified battery manufacturing equipment to meet specific production requirements. Upgrades and automation enhancements to optimize throughput, reduce costs, and improve quality.

In addition, we design and develop automation for EV battery production. We can help you create automation equipment that allow maximum flexibility, quality results, and high production.

Learn how to overcome challenges in lithium-ion battery pack assembly with automation, customization, and advanced process control for EV and electronics production.

We have extensive manufacturing experience covering services such as battery enclosures, grid energy storage systems, server cabinets and other sheet metal enclosure OEM services..
