Zenith Energy Terminals, one of the largest storage terminals in the port, has signed a Memorandum of Understanding with German company INERATEC to construct a Power-to-Liquid ...

company INERATEC to construct a Power-to-Liquid plant in the Port of Amsterdam. A Power-to Liquid plant converts renewable energy (power) to a sustainable fuel (liquid). The plant has a planned ...

The facilities will comprise a LOHC dehydrogenation plant with a final release capacity of up to 100-500 tonnes of hydrogen per day as well as related storage and handling facilities.

Smart integration features now allow multiple containers to operate as coordinated virtual power plants, increasing revenue potential by 25% through peak shaving and grid services.

Most recently, Greenergy completed expansion works in 2024 that increased the plant's production capacity by 25 percent. These enhancements have enabled the facility to process a ...

As Europe pushes toward net-zero goals, Amsterdam has emerged as a testing ground for cutting-edge solutions - from football stadiums doubling as giant batteries to solar-powered bike ...

Greenergy, a leading European producer of biodiesel from waste, announces a ten-year extension to its lease with the Port of Amsterdam, reinforcing its long-term commitment to biofuel ...

Greenergy, a leading European producer of biodiesel from waste, announces a 10-year extension to its lease with the Port of Amsterdam, reinforcing its long-term commitment to biofuel ...
