The protests are rooted in a combination of historical grievances and recent triggers. On 15 September 2025, Transparency International helped organize a small rally known as Democrasia Mainty in Ambohitovo, Antananarivo. On 18 September 2025, politicians Clémentine Raharinirina and Baba Faniry Rakotoarisoa publicly called for mass protests in front of the Senate in Anosy to denounce chronic power outages, water cuts, and sy...

Additionally, compliance with local and international energy policies can be achieved through effective load management strategies. Through these strategies, load shifting emerges as a ...

Load shedding is a method used to manage electricity demand by distributing it across multiple power sources. This technique is employed to prevent overloading a primary power source ...

Authorities in Madagascar have imposed a dusk-to-dawn curfew in the capital, Antananarivo, following protests against frequent power outages and water shortages that turned ...

Discover how Antananarivo's traders are adapting to power outages, balancing fatigue and creativity on a daily basis.

Discover why water cuts and load shedding in Antananarivo increase residents' daily frustration.

For several weeks, Antananarivo and its surroundings have lived to the rhythm of power cuts, sometimes for several hours, plunging inhabitants and companies in uncertainty.

Understanding the differences between load shedding and load shifting is crucial for both consumers and energy providers. While load shedding serves as a critical tool for emergency grid ...
