According to the Minister of Territorial Administration and Infrastructure, large-scale programs are underway to develop and integrate new solar power plants, which will significantly ...

Solar thermal energy is therefore developing rapidly in Armenia. Because solar water heating systems not only ensure energy savings but have become cost-effective, they have been installed in ...

In 2019, the European Union announced plans to assist Armenia towards developing its solar power capacity. The initiative has supported the construction of a power plant with 4,000 solar panels ...

The solar power plant, with an installed capacity of 200 MW, will occupy an area of 500 hectares in the Talin and Dashtadem communities of the Aragatsotn region of Armenia. The total ...

Armenia's mountainous terrain and 300+ annual sunny days make it an ideal candidate for photovoltaic systems. The Gyumri Solar Project - operational since 2022 - stands as a 12 MW clean energy hub, ...

Armenia's geography provides an ideal setting for solar power generation, with over 2,500 hours of sunshine annually. Recognizing this potential, the government introduced policies and ...

Armenia is significantly increasing its focus on solar power development in 2025, a move underscored by Prime Minister Nikol Pashinyan's call for greater attention to solar energy expansion.

Armenia has surpassed 1 GW of installed solar capacity, meeting its national solar target four years ahead of schedule, according to Infrastructure Minister David Khudatyan. The...
