---

Battery Energy Storage Systems (BESS) and related solutions are critical for Asian countries to reach stated renewable energy targets. Many governments have already identified this ...

Southeast Asia can look to Australia and Japan as examples of how to promote the adoption of energy storage systems (and, once the necessary regulations are in place, the potential speed of the rollout).

Trina Storage, the energy storage division of global solar leader Trinasolar, has reached a major milestone with its installed capacity of large-scale energy storage systems surpassing 2.4 ...

Large-scale battery systems are being deployed for frequency regulation, peak shaving, and load balancing, transforming how power is stored and consumed in Asia. Battery energy storage ...

The policy and regulatory roadmap is aimed at pushing China's installed base of large-scale energy storage - primarily lithium-ion battery ...

In India, developers are increasingly pairing large-scale solar and wind projects with long-duration battery storage solutions, moving beyond traditional hydro-based systems.

As demand for grid-scale storage continues to accelerate across key APAC markets, Trina Storage has been selected to supply advanced BESS technology for several large-scale ...

The Shanghai-based battery facility, particularly focused on Megapack production, enhances Tesla's ability to supply grid-scale energy storage solutions across Asia and beyond. This initiative ...
