Discover essential energy sources for powering refrigerated analog shipping containers. Learn efficient, reliable solutions for temperature-controlled logistics.

Gensets provide consistent temperature control by ensuring uninterrupted power to the refrigeration unit. This minimizes the risk of spoilage from temperature fluctuations during transit ...

From powering up reefer containers on lengthy sea voyages to ensuring temperature control during ground transportation, they provide a reliable solution no matter the distance involved. Getting a grip ...

Designed for high-performance, temperature-controlled cold storage, Solarators® operate as efficiently as industrial freezers and chillers--without the fuel costs, emissions, or grid dependency.

Reefer containers typically operate on a standard voltage of 380-460V and require three-phase electrical plugs to function efficiently. This setup ensures a stable and consistent power supply, which is critical ...

Carrier's industry-leading PowerLINE Generator Sets are designed and built for continuous, unattended operation for all refrigerated containers transported by road or rail worldwide. No matter your region's ...

Contact us today to hire our refrigerated containers and clip-on generators and enjoy the peace of mind that comes with knowing your temperature sensitive goods are in safe hands.

Reefer, the generic name for a temperature controlled container, is an insulated container which allows circulation of temperature controlled air within it. OOCL has a fleet of over 25,000 reefers, including ...
