Today, we're highlighting the 10 trailblazers making lead-acid battery recycling safe, efficient, and accessible across Malawi. These suppliers don't just sell machines; they deliver hope for cleaner ...

Researchers at The University of Manchester have identified dangerous levels of lead pollution in Malawi due to informal recycling of lead- acid batteries from off-grid solar systems.

Abstract This study performs the first life cycle assessment of solar home systems (SHSs) to use data quantifying lead pollution from informal lead-acid battery recycling.

The lack of infrastructure and policy around e-waste and batteries opens the door to unsafe battery recycling practices in Malawi, indicating a bigger problem for sub-Saharan Africa.

Researchers at The University of Manchester have identified dangerous levels of lead pollution in Malawi due to informal recycling of lead-acid batteries from off-grid solar systems. This ...

The informal recycling of lead-acid batteries used in off-grid solar systems in Malawi is causing a severe environmental and public health crisis, according to a study conducted by ...

Description: This study performs the first life cycle assessment of solar home systems (SHSs) to use data quantifying lead pollution from informal lead-acid battery recycling.

As off-grid solar transforms energy access in Malawi, a hidden crisis is unfolding. The uncontrolled recycling of lead-acid batteries is contaminating neighbourhoods, "damaging" children's ...
