-----

Norway is home to a circular battery ecosystem encompassing expert raw materials processing and sustainable battery cell production as well as application and integration of batteries for maritime and ...

itutes on cutting edge research. The Battery Technology Department at IFE is now one of Norway's largest research groups on batteries, and we continue to grow to meet the ri.

Battery cell production: One "giga factory" project now ramping up Battery packs, modules and systems developed for maritime sector Early adoption of EV -> Early collection/reuse/recycling of batteries

he battery value chain with focus on eight main areas. These are raw materials and recycling, new and emerging technologies, advanced materials, digitalisation, manufacturing technology, battery ...

The Battery Technology Department performs research and development on materials, cells and modules level. We work with various partners along the entire value chain to support the ...

"Access to batteries is one of the greatest challenges of the green shift and we have an advantage that can make Norway a major battery-producing country. We have spent two years creating the Morrow ...

Although Norwegian companies are at the forefront of next generation battery technologies, the successful battery manufacturers will not be the ones with the newest and most complex battery ...

Battery technology is essential to meet Europe and Norway's zero emission targets by 2050 because they will facilitate the decarbonization of the European energy and transport sectors.
