---

Introducing the solar power system by Baicheng International, a cutting-edge solution designed to harness the sun's energy for sustainable power generation.

This year, Baicheng, whose area is less than 26,000 square kilometers, increased its installed capacity of new energy to over 10,000 megawatts, equivalent to nearly half of the capacity ...

Jilin Baicheng Front Runner solar farm is an operating solar photovoltaic (PV) farm in Anguang Town, Da'an City, Baicheng, Jilin, China.

In 2017, Baicheng stood out among 34 applicant cities nationwide and became one of 13 selected cities. It was approved by the State as the third batch of leading bases for photovoltaic ...

Baicheng Solar PV Park-CGN is a ground-mounted solar project which is spread over an area of 4,670,000 square meters. The project generates 310GWh of electricity.

The development of new energy - represented by wind energy, solar energy and biomass energy - is widely considered to be one of the most competitive endeavors in Jilin province.

Baicheng, a pioneering hub for clean energy in Northeast China's Jilin province, is intensifying efforts to develop solar and wind resources alongside energy storage stations, aiming to leverage ...

In June 2019, after rigorous review, Baicheng was determined by the National Energy Administration as one of the three incentive and incentive bases for the third batch of photovoltaic power generation ...
