Faced with chronic shortages from the public supplier Electricité du Liban (EDL), rampant private diesel generator rationing, and high fuel prices and electric bills, Lebanese citizens ...

Since its energy and financial systems collapsed in 2019-21, Lebanon has experienced a rapid solar boom--with solar production increasing tenfold in just a few years--that has profoundly ...

Nine years ago, Lebanon completed the first phase of its largest national solar energy project, the "Beirut River Solar Snake," generating 1 megawatt of electricity for Electricité du Liban ...

While it remains an imperfect solution, Lebanon's situation has shown the power of solar and how it can provide a source of clean and reliable electricity when other electricity systems break...

This has pushed tens of thousands of Lebanese to look for alternatives - and notably to solar photovoltaics - in an attempt to ensure their basic electricity coverage. Since early 2020, solar ...

Like tens of thousands of Lebanese people, the Mazloums have turned to solar power to generate reliable--and cost-effective--electricity in a country where the crisis-stricken state provides ...

While possibilities remain for remaking Lebanon's energy system through these emerging technologies, for many residents, solar off-grid systems have increasingly served as stop-gap ...

We are on a mission to accelerate the transition to renewable energy by providing professional energy consulting services, industrial (EPC) services, and increasing public energy literacy and awareness.
