Our testing and consulting services are targeted at the rapid technological changes within the field of electric mobility. We can support you with economically sensible product qualification concepts, ...

In our battery labs, we test cells, modules, and packs to support the selection of the most suitable battery cell for each specific application. Our testing infrastructure also enables endurance and ...

Our battery tests include lifecycle and calendar life testing as well as battery characterisation. Our experts can customise the testing setup to your individual and specific customer requirements.

MOBI's Battery Innovation Centre is the largest academic battery lab in Belgium. In our battery test lab, we test battery cells, modules and packs of any size.

This facility provides also in-situ thermal imaging, electrochemical measurements, cell preparation, pre- and post-test battery cell tear-down and post-mortem diagnosis.

Complete range of instruments to characterize the composition and thermal/mechanical behavior of battery components - cell membrane, electrolytes and electrodes

With ISO/IEC 17025 laboratory accreditation, lithium battery expertise and over 30 years" experience of the requirements and test methods of vehicle manufacturers, we can meet all your battery testing ...

Here, we test batteries in different conditions with fully customised protocols to determine their capacity and performance. This way, we not only test whether a battery is adequate for the desired ...
