-----

A flurry of large-scale BESS project news in the US from four major developer-operators, coinciding with the country's largest clean energy trade show RE+.

The "Project Lite Brite" at 35 Electric Ave. is located next to an Eversource substation, and will be designed to store excess energy from renewable sources such as offshore wind, developer Flatiron ...

Battery storage systems are taking off in Massachusetts, and residents are getting paid to install them in their homes and businesses.

It requires investor-owned utilities to secure 5,000 megawatts (MW) of storage by 2030. This includes 3,500 MW of mid-duration, 750 MW of long-duration, and another 750 MW for multi ...

Massachusetts aims for 5,000 megawatts of battery storage by 2030, but residents voice safety and environmental concerns over the rapid expansion.

The following section describes how the Commonwealth will use the new technology of Energy Storage and summarizes the target for 1000 MegaWatt hours (MWh) of Energy Storage in Mass. by 2025.

The Commonwealth issued a draft request for proposals of 1.5 GW of batteries with storage durations of 4 to 10 hours, primarily funded through the state's Clean Peak Standard. The ...

Massachusetts is making a big push for batteries -- not the kind you put in a flashlight, but powerful, tractor trailer-sized batteries that store energy for the electric grid. State officials say...
