---

At 150 MW / 300 MWh, Cranberry Point is helping the Commonwealth reach roughly a third of its goal to deploy 1,000 MWh of battery energy storage by 2025.

US solar and energy storage development platform ESA Solar Energy on Monday unveiled plans for two battery energy storage projects in Massachusetts with a combined capacity of ...

Battery storage systems are taking off in Massachusetts, and residents are getting paid to install them in their homes and businesses.

This innovative collaboration with Enel X will enable us to take the campus to the next level by generating and storing energy in a fashion that minimizes our costs and maximizes the value of the ...

The initial wave of projects will commence operations this summer, with four projects already under construction in the towns of Groton, Holden, and Paxton.

Discover how ESA is advancing energy storage with its Sturbridge and Carpenter Hill projects, enhancing reliability and supporting renewable goals in Massachusetts.

Summary: The Boston Battery Energy Storage Station represents a transformative leap in grid-scale energy solutions. This article explores its technological innovations, industry applications, and ...

The Commonwealth overruled the decisions of its own siting boards and one town's moratoria on all solar and storage projects, paving the way for the imminent construction of two ...
