Bulgaria's energy sector is at a critical juncture, with two main objectives shaping its direction: decarbonization and reducing reliance on Russian energy. Over the past year, Bulgaria ...

A 16.2 MW solar power plant in Zdravetz, Bulgaria was expected to be completed in June 2012, with power being sold for \$0.30/ kWh in a fixed rate 20 year power purchase agreement.

The minimum value, 0 billion kilowatthours, was reached in 1980 while the maximum of 3.25 billion kilowatthours was recorded in 2023. See the global rankings or world map for that indicator or use ...

To expand low-carbon electricity generation, Bulgaria can make strategic advances in its existing strengths of nuclear and solar power. Looking towards reference regions, Bulgaria could emulate ...

Solar power generated 12% of Bulgaria's electricity in 2023. By the end of 2020 about 1 GW of solar PV had been installed. It has been estimated that there is potential for at least another 4 GW by 2030. By the end of 2024 about 3.9 GW of solar had been installed. On March 13, 2023, peak photovoltaics power was 30% of Bulgaria electricity ...

The Ministry of Energy of the Republic of Bulgaria has announced two requests for proposals for tender participation to support new renewable electricity generation and energy storage ...

This auction is a crucial part of Bulgaria's National Recovery and Sustainability Plan, aiming to support economic and social recovery post-pandemic while promoting the optimization and ...

In a matter of months, Bulgaria's total solar power capacity is set to exceed 3 GW, compared to just 1.3 GW at the end of 2021. The lineup in the list of the largest photovoltaic plants is ...
