What is a laptop locker?

with the latest news and deals. Laptop lockers made for the storage and charging of laptops, tablets, and other flat mobile devices.

Why should you use a laptop locker?

Enjoy a wire-free workspace by charging your devices while they're stored away. Our laptop lockers are supplied with built-in chargers, allowing you to charge your laptops and other devices when not in use. Meaning everything is always fully charged and ready to go.

Should you lock your computer?

Locking the computer should be as basic as not writing down passwords or not taping login details to the bottom of the keyboard. It should become a mindless habit. You may even want to set a company policy that stipulates that computers are to be locked any time an employee walks away for any reason or any anticipated length of time.

Where should you keep your laptop or tablet?

Never leave your laptop or tablet out of your sight, even for a moment. Busy places such as bus and train stations, airports, offices, conference and seminar centers, restaurants, hotels, college campuses, phone booths, libraries, and hospitals are places where thieves who are on the lookout for laptops and tablets easily blend into the crowd.

If you bring a new computer into the United States, you may have to pay an import tax. To prove your equipment is not new, have your device's sales receipt or insurance documentation with you. To ...

Moisture and dust can accumulate over time, potentially damaging your devices. Always place your electronics on shelves or use pallets to elevate them off the ground.

Before storing your electronics make sure to speak with your storage unit manager who can provide you with specific advice on your electronics' storage. In general, it's okay to leave electronics in a storage ...

For those curious, there are lots of reasons a locker may be preferable to leaving a laptop in a car or unsecured in a hotel room (most in-room safes are too small for laptops).

While you can store most types of electronics in a storage unit, it's important to consider the climate and conditions of the storage facility. Some electronics, such as computers and TVs, are ...
