A solar panel recycling company plans to construct a \$344 million factory in Georgia to manufacture solar panel glass.

Researchers have proven that solar panels made with recycled glass can be just as efficient as those made with new materials.

The company plans to build a solar glass factory in Cedartown, Georgia, next to its existing recycling factory. It'll be the first in the world to use recycled cullet like this at commercial...

A breakthrough in solar panel manufacturing takes a significant step toward a "closed-loop" manufacturing process. Researchers at SolarCycle and Arizona State University (ASU) ...

With PV module capacity ramping up, glass suppliers have been investing in new solar glass production capacity. As in India and China, new facilities are popping up in North America, with ...

Recent developments in glass manufacturing have led to ultra-clear, low-iron glass, which enhances light transmission and improves efficiency. In addition, new innovations in tempered glass ...

A major multinational glass company has verified that the crushed glass produced from used solar modules by Solarcycle can be used to make high-quality PV glass sheets, which has ...

While solar panels have long been recognized for their power generation capabilities, recent advances in solar glass processing are paving the way for a new generation of energy-efficient and ...
