The Protect Integrated power distribution cabinet integrates the power supply and distribution system of the server room (ATS/MCCB, air conditioning distribution, lighting distribution, UPS power supply, ...

The critical functions of data centers must be safeguarded from power surges caused by unreliable "dirty" power off the grid or by direct and indirect lightning strikes.

We'll explore the risk of lightning to databases, the components of robust lightning protection systems, and the reliable practices data centers should adopt to ensure optimal protection ...

In the event of a lightning strike, the right lightning protection products can safeguard your power supply lines from being affected or harmed in a storm. This, in turn, protects the entire data center from ...

Our advanced lightning protection for data centers are engineered specifically for the unique challenges of complex power infrastructure.

The communication cabinet adopts a standard cabinet and modular structural design, integrating functions such as system data collection, real-time monitoring, system lightning protection, grid ...

They feature power supply, distribution, and protection equipment as well as radio systems and passive or active cooling. Contact us today to learn about all the options and to find a solution that is right for ...

We design and implement comprehensive lightning protection systems for communications infrastructure, including cell towers, data centers, and transmission facilities.
