Is Colombia launching a solar storage tender?

Colombia's Ministry of Energy and Mines is considering launching tenders for storage co-located with solar and wind farms in La Guajira, a region with high renewable resource potential but weak grid infrastructure. Argentina entered the BESS race with the "Alma GBA" tender for 500 MW of storage, launched in early 2025 and worth \$500 million.

What is battery energy storage systems (Bess)?

Latin America is entering a transformative decade in its energy landscape, driven by the urgent need to expand power output, decarbonize, lower energy costs, improve grid resilience, and integrate massive volumes of renewable energy. Battery Energy Storage Systems (BESS) have emerged as the linchpin technology to realize these objectives.

Is battery energy storage a linchpin technology?

Battery Energy Storage Systems (BESS) have emerged as the linchpin technology to realize these objectives. With projected revenues of nearly \$5.9 billion by 2030--up from \$680 million in 2023--the region is poised for a rapid and uneven expansion in storage markets across utility-scale, commercial & industrial (C& I), and remote grid applications.

Why do data centers need a battery system?

For example, data centers and large manufacturers are deploying battery systems to ride through outages and perform peak shaving (reducing peak demand charges) - demand for storage components in Brazil's C& I segment jumped nearly 90% from 2023 to 2024.

Local developers like Quartux and ON Energy have installed dozens of MWh of behind-the-meter batteries at hotels, resorts, and factories in tourist regions like Cancun - A 25 MWh C& I ...

Colombia's new regulation on battery storage marks a turning point for the sector. Risen Energy is accelerating its regional strategy with solutions for residential, C& I and utility-scale ...

Key trends in the market include a rise in utility-scale battery storage projects to support grid stability and reduce reliance on fossil fuels, as well as a growing interest in behind-the-meter storage systems for ...

Based on this assessment, BATX remanufactures viable modules, transforming them into stationary energy storage systems, ideal for solar and other renewable energy applications.

Colombia energy storage batteries have several models

Colombia's first grid-scale battery energy storage system (BESS) came online in 2023 near Medellin - a 20MW/40MWh behemoth that's essentially a giant Tesla Powerwall for the national ...

The AC-coupled BESS comprises a 20-foot shipping container unit with 120 battery packs totalling 2MWh of energy storage capacity with a power rating of 1MW. The LFP cells inside have a ...

Colombian Technology Catalogue for Power Generation and Storage Technologies 2025. This technology catalogue is developed using best available data at the time of publication. The data can ...

As renewable penetration rises, energy storage systems (ESS) and hybrid generation models are emerging as essential tools for maintaining reliability, managing intermittency, and ...
