Can a containerized Solar System be installed off-grid?

Off-Grid Installer have the answer with a containerized solar system from 3 kw up wards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.

How big is a battery storage system?

The battery storage system, including power electronics and connection unit, is stored in a container of between 10 and 20 feet in size. The storage system is based on proven lithium-ion technology (LiFePO) and sophisticated electronics.

Can a solarfold battery be used at night?

In order to be able to use the generated energy even during the night, it is recommended to expand the solarfold container with a storage container. The battery storage system, including power electronics and connection unit, is stored in a container of between 10 and 20 feet in size.

How many homes can a solarfold Container Supply?

The on-grid version of the solarfold container is connected directly to the public power grid and can supply up to 40 single-family homes with the energy produced (energy requirement of 3,500 kW/year/single-family house). The solarfold on-grid container can also be expanded with various storage solutions.

Each solar-powered shipping container generator is transportable, securable, and can be fully customized to your specific needs, including hybrid and microgrid compatibility.

MOBIPOWER hybrid clean power containers combine battery energy storage systems with off-grid solar containers for remote industrial sites in Canada & USA.

The comprehensive Battery Assembly solution can be equipped with an array of options, including unpacking, waste disposal, electrical testing, enclosure and casing assembly, PCB assembly, laser ...

Each solar-powered shipping container generator is transportable, securable, and can be fully customized to your specific needs, ...
