Learn how terminals are embracing renewable energy, highlighting solar, wind, electrification & grid resilience with LBCT.

At the Port Newark Container Terminal in New Jersey, solar panels have been shoehorned into a tightly packed, high-traffic shipping facility, without disrupting operations or taking up...

"By working hand-in-hand with PNCT and the city of Newark, our seaport is now home to a large solar energy project capable of generating significant energy for one of its major container ...

The installation has the capacity to feed surplus energy into the regional utility grid, providing clean power to Newark and surrounding communities. PNCT is now among the world's ...

Renewables to Power Ports Port Newark Solar Microgrid (Newark, New Jersey, USA; 2023-2025)

Standard Solar installed the project, which is made of rooftop installations and solar canopy systems to avoid taking up ground space in the bustling port. The project provides approximately ...

The completion of this solar energy project marks an important milestone not only for Port Newark Container Terminal but also sets an example for ports worldwide seeking sustainable ...

Generating renewable power on-site at the port terminals can significantly reduce this off-site pollution, improve public opinion of the ports, and reduce the terminal's energy expenses. Container terminals ...
