Hos Stena Recycling indsamler vi mange oplysninger som muligt om de batterier, vi h&#229;ndterer, n&#229;r vi udf&#248;rer genanvendelse. Derefter m&#230;rker vi hvert batteri, s&#229; det kan spores sikkert og effektivt i ...

The purpose of the campaign is therefore to help Danes become even better at handing in their spent batteries for recycling. Then we can recycle the raw materials instead of using the earth's scarce ...

Hazardous waste types, such as batteries and electronic waste should be brought to one of the numerous recycling stations (read more details above) across Copenhagen.

Our solutions cover all aspects of battery recycling and can simplify processes for all businesses, small to large. We can provide battery collections for your premises and manage all your compliance needs.

Denmark has stringent regulations regarding waste management and recycling, particularly under the European Union's battery directive, which mandates proper disposal and recycling of used batteries.

From a TV remote to your kid's favourite toy, batteries power our world, and recycling them is a small act that makes a massive difference. We're proud to support a greener future by making battery ...

Reprocessing and recycling of waste electronics cover several processes that may take place in Denmark or abroad. Regarding waste electronics, the first manual dismantling and shredding will ...

The intricacy of recycling these materials individually is compounded when they are part of the cell structure. Our expertise lies in meticulous disassembly of battery cells across multiple stages, ...
