Westell's Power Distribution Solution includes an extensive line of circuit breaker and fuse panels for secondary power distribution and primary protection applications.

The DST is a high density Telecom Rackmount DC Distribution Panel designed to accommodate virtually any 48V, 24V or 12V DC power distribution requirement. Its flexibility makes it ideal for all ...

Its flexibility makes it ideal for all telecom site DC power requirements, large and small. These distribution panels accommodate up to 10 or 20 circuit breakers (DST10 and DST20) within a ...

This modular 1800 amp @ -48vdc (positive ground) power system is the ideal choice for communication centers, data centers and microwave applications. Enclosed in a 7"H x 26"W x 26:D box frame, the ...

The method of connection of the battery, battery charger, and DC distribution systems depends on the duty, the type or load, and whether the system needs to be duplicated or whether ...

The DB-5 is a 5 position fused DC power distribution block designed to use standard ATC/ATO fuses. This power distribution block is built for up to 20 Amps maximum per fuse for a maximum current of ...

With up to two power shelves and two distribution panels, the Integrated DC Power System offers expanded options for power and distribution in a compact design. Ample current and distribution ...

DC load distribution panels are an integral part of safe, efficient communications site designs. Multiple loads can be connected to allow a DC power supply to distribute power to up to 12 devices such as ...
