-----

Dunhuang was chosen to be the home of this large-scale solar thermal power station because of its abundant sunlight resources. Meanwhile, the city's booming tourism industry also ...

The photovoltaic power station, in conjunction with the Dadu River Midstream Pubugou Hydropower Station, creates a synergy of water and light, effectively enhancing the power generation ...

By integrating traditional fishing industries with solar and energy storage technologies, the project embodies the principles of sustainable and eco-friendly development, with aquaculture ...

The photovoltaic plant is currently the largest solar power plant in the world. Previously, China's state-owned Huanghe Hydropower Development commissioned the world's largest solar ...

China is leveraging its vast desert regions to develop large-scale solar and wind power bases that not only generate clean energy but also play a vital role in reversing desertification, ...

China has made a revolutionary breakthrough in renewable energy engineering after it just launched the world's first solar-thermal power plant that utilizes a dual-tower system to generate...

It's the largest single-unit solar power station in the world, and covers a staggering 200,000 acres [312 square miles] of desert. It generates enough electricity every year to power three...

A gigantic 2-gigawatt agrivoltaic project in China will generate clean power while restoring vegetation in a desert.
