From powering telecom towers to deploying fully integrated data center environments and intelligent cooling systems, we engineer the future of critical infrastructure.

Several actions related to the data lifecycle, such as data discovery, do require an understanding of the data, technology, and information infrastructures that may result from ...

DC back up for 12V, 48V or 400V power. Building your core site with reliable components designed to achieve high efficiency is a great way to control cost - from the rectifiers within the DC power ...

DC Power Systems provides quality, reliable and efficient DC power equipment and products for a range for telecom, data center, and industrial applications.

Introduce attendees to our open source data platform for big data Mixture of: instruction, demos, hands-on exercises, small group project Focus on quantitative data and statistical ...

Big data EO management and analysis 40 years of Earth Observation data of land change accessible for analysis and modelling.

Micro data center fully integrated with triple rack space, rack cooling, AC/DC power, battery, power distribution, security, monitoring and fire systems. IP55 protection and thermal insulated for outdoor ...

Underlying Rationale In 2015, the Belmont Forum adopted the Open Data Policy and Principles . The e-Infrastructures & Data Management Project is designed to support the operationalization of this ...
