Designed for C& I applications, it combines a PCS, BMS, LiFePO4 batteries, and EMS into a single, sleek cabinet to significantly reduce your energy costs and enhance power reliability.

Equipped with fire protection and flexible AC/DC configuration, its lightweight design enables easy installation, delivering a safe, efficient all-in-one energy storage solution.

Battery Energy Storage System (BESS) BESS enables efficient storage of energy from renewable or grid sources, ensuring stable and reliable power supply. It stores low-cost electricity during off-peak ...

Our product can obtain local load power in real time, the photovoltaic power is self-use first, and the left power is stored; When the power generated by photovoltaic power generation is insufficient to ...

Housed in a weather-resistant IP55 cabinet, it combines a 100kWh LiFePO4 battery pack with 50kW charge/discharge capability, supporting real-time monitoring and remote control via Ethernet, RS485, ...

Designed for rapid deployment and flexible expansion, it offers high energy efficiency, system safety, and intelligent control for commercial and industrial applications.

This integrated design significantly reduces on-site installation and commissioning time, allowing for quick and easy deployment in various environments. With a plug-and-play concept, the system can ...

This achieves an integrated "PV + Energy Storage" solution. The cabinet system adopts a modular design, allowing flexible configurations for photovoltaic, batteries, and loads, meeting various user ...
