If the Mojave Desert Solar plant in the USA has ended up as a pitiable non-starter, India is going to witness many, many Mojave-Desert-like solar scams soon, calling not only for an...

We aim to quantify the impacts of a large-scale deployment of photovoltaic solar farms in the Sahara on global solar power generation as a pilot case study, and investigate the underlying...

The downfall of one of the largest solar power plants in the American Mojave Desert, now nearing its end due to the decreasing cost of green energy, has become "proof" of the impracticality ...

It's likely a scam. While there are some government-funded solar programs for households that qualify, "going solar" isn't free. Honest businesses will tell you exactly how much it'll ...

These scams start with an unexpected phone call, message on social, or even an in-person visit. The so-called official offers you an "energy audit" to reduce your utility costs. Or they might try to sign you ...

If your solar installation is not properly permitted, you may face fines, penalties, ...

Scams are unfortunately common in the solar industry. Learn more about some of the most likely scams you may face when trying to go solar.

Despite the contribution to easing the energy crisis and combating climate change, large-scale construction and operation of PV power stations can change the land cover and affect the ...
