Will IFC support Egypt's first utility-scale battery energy storage system?

Cairo, Egypt, June 15, 2025 - IFC today announced an investment to support Egypt's first utility-scale battery energy storage system (BESS), deepening its partnership with AMEA Power, a leading renewable energy developer in Africa, the Middle East, and Central Asia, and the Government of Egypt to advance the country's clean energy ambitions.

What are the international standards for battery energy storage systems?

Appendix 1 includes a summary of applicable international standards for domestic battery energy storage systems (BESSs). When a standard exists as a British standard (BS) based on a European (EN or HD) standard, the BS version is referenced. The standards are divided into the following categories: Safety standards for electrical installations.

What is a battery energy storage standard?

The standard has been developed for use by manufacturers, system integrators, designers and installers of battery energy storage systems. It intends to set out the requirements for the safety and installation of battery systems connected to power conversion equipment for the supply of AC and DC power.

IFC today announced an investment to support Egypt's first utility-scale battery energy storage system (BESS), deepening its partnership with AMEA Power, a leading renewable energy ...

Earlier in January, Egyptian company Kemet and Chinese group Krenex signed an agreement to localize the production of energy-storage battery cells and establish an integrated ...

The new battery energy storage systems promise a stable, reliable, and greener energy future. The projects provide a solid foundation for further development and innovation in Egypt's ...

Cornex wins major Saudi and Egypt energy storage deals strengthening its global presence and accelerating large scale battery deployments.

High renewable energy penetration targets cannot be achieved without more reliance on energy storage technologies. This study provides a long-term techno-economic analysis for the ...

Cairo, Egypt - In a historic move for North Africa's energy sector, AMEA Power has successfully commissioned Egypt's first-ever utility-scale Battery Energy Storage System (BESS)--a ...

Can batteries solve Egypt's Electricity oversupply problem? Egypt is exploring the potential of energy storage through batteries to combat our electricity oversupply problem: As Egypt continues to suffer ...

This milestone follows the project's recent financial close, marking a significant step forward in AMEA Power's strategy to enhance energy security and grid stability in emerging markets. ...
