What is an emergency solar generator?

Emergency solar generators are portable power systems that use solar energy to charge a built-in battery, which then supplies electricity to your devices. They're a clean, quiet, and fuel-free alternative to gas generators. A typical setup includes solar panels, a battery, and an inverter to convert stored energy into usable power.

What is the best backup solar power kit?

The Ultimate Emergency Back Up Solar Power kit combines the massive Bluetti EB240 solar generator and the best selling EcoFlow Delta 1800. This emergency backup solar powered generator kit gives you a total of 3,700 watt hours (3.7kwh) of lithium battery bank storage.

Why do you need an emergency solar power kit?

Having a reliable emergency solar power kit is essential for emergency preparedness, off-grid living, and safe backcountry adventures. The best kits offer a powerful source of clean, reliable energy for any non-traditional power needs.

How much power does an emergency solar power kit use?

If you need emergency power for an entire house or to support power-hungry appliances like air conditioners, you're better off with a 2000-3000W rating. The battery capacity, measured in watt hours (Wh), tells you how much energy an emergency solar power kit can store.
