Firstly, the HJ-SG-R01 uses a hybrid energy system to manage various energy sources, including solar, wind, and traditional power. Solar panels and wind turbines convert natural energy ...

It is used in scenarios such as communication base stations, smart cities, transportation, power systems and other edge sites to provide stable power supply and optical distribution networks.

This large-capacity, modular outdoor base station seamlessly integrates photovoltaic, wind power, and energy storage to provide a stable DC48V power supply and optical distribution.

Perfect for communication base stations, smart cities, transportation, power systems, and edge sites, it also empowers medium to high-power sites off-grid with an energy-efficient, hybrid renewable solution.

Suitable for communication base stations, smart cities, transportation, and power systems, providing stable backup power and optical fiber connectivity in edge site scenarios

The HJ-SG-R01 is designed to integrate multiple green energy sources such as solar, wind power, and diesel generators. This makes it ideal for remote areas in Australia where grid connectivity is limited.

Communication container station energy storage systems (HJ-SG-R01) Product Features. Supports Multiple Green Energy Sources Integrates solar, wind power, diesel generators, and energy storage ...

Highjoule's HJ-SG Series Solar Container was built for one purpose: keeping base stations running where there's no grid power. It integrates solar PV, battery storage, backup diesel, ...
