Colombia, like many countries, is experiencing an increasing energy demand as well as challenges related to security of supply.

Let's cut to the chase - when you hear off-grid energy storage charging pile, you might picture a solar-powered yurt in Montana. But hold onto your electric scooters!

Colombia's first grid-scale battery energy storage system (BESS) came online in 2023 near Medellin - a 20MW/40MWh behemoth that's essentially a giant Tesla Powerwall for the national grid.

A new regulatory proposal from the Colombian government outlines the technical and commercial rules for energy storage assets. The framework targets both the national grid and remote ...

This analysis explores Colombia's EV charging station landscape, detailing the national policies fueling growth, the current state of infrastructure development, key opportunities for stakeholders, ...

This article serves EV infrastructure developers, municipal planners, and renewable energy contractors seeking compliance with evolving technical standards for energy storage-integrated charging systems.

From large-scale pumped hydroelectric storage to cutting-edge battery technologies, Colombia explores a diverse array of options to efficiently store and manage energy, thereby guaranteeing a ...

But here's the kicker: this South American gem is quietly becoming a hotspot for innovative energy solutions. With its growing renewable energy sector and unique geographical ...
