Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in the integration of various storage ...

Designed for grid stabilization, renewable integration, and industrial backup power, they integrate lithium-ion batteries, thermal management, inverters, and battery management systems (BMS). ...

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed for crude oil ...

Guangdong ASGOFT New Energy Co., Ltd is a professional manufacturer for designing, manufacturing, and selling lithium iron phosphate batteries, and energy storage battery packs, committing to ...

The MIT-GE Vernova Climate and Energy Alliance, a five-year collaboration between MIT and GE Vernova, aims to accelerate the energy transition and scale new innovations.

At the MIT Energy Initiative's Annual Research Conference, industry leaders agreed collaboration is key to advancing critical technologies amidst a changing energy landscape.

MIT researchers developed a new fabrication method that could enable them to stack multiple active components, like transistors and memory units, on top of an existing circuit, which ...

MIT News explores the environmental and sustainability implications of generative AI technologies and applications.
