What is OPC Data Manager?

OPC Data Manager is specifically designed to share real-time, historical, and Alarm & Events data between two or more control systems in a secure and reliable manner. The interface is intuitive making the mapping process quick and easy. OLE for Process Control (OPC) servers are available for every major system on the market today.

What are micro DC data communication cabinets?

This version of Micro DC data communication cabinets are equipped with integrated environmental monitoring systems and fire detection and suppression. The cabinets are also equipped with a redundant power supply, PDU and distribution panel. The cabinets are available in dimensions 600 x 900 mm and 9800 x 1100 mm.

Why should European telecom operators invest in the networks of the future?

If European telecom operators are able to reap the full benefits of these technologies, the networks of the future will greatly contribute to the EU policy ambitions to enable autonomous, resilient, and sustainable networks that secure digital sovereignty and industry competitiveness.

Why are European telecommunication operators struggling?

However, European telecommunication operators face significant pressures currently: increasing investment and network upgrade needs, security challenges, and a fragmented and heavily regulated EU market, have resulted in declining profitability.

We support, fund and regulate digital and frontier technologies to strengthen our democracy and to make Europe safe, more competitive and technologically sovereign. We enforce the European ...
