The international research group specifically mentioned storing solar and wind energy in the release. Reliable batteries are crucial to saving renewable energy for later use.

Validates safety performance of energy storage containers under real fire conditions by simulating: extreme thermal runaway propagation, explosion risks, and fire suppression system effectiveness.

Energy storage systems are growing worldwide. Explore the challenges of explosion protection for ESS systems.

An explosion at a Pennsylvania metal fabricating plant injured four people during chemical transfer on Thursday night in Washington County.

An explosion this morning at Accurate Energetic Systems military munitions plant has left over a dozen people missing, with multiple fatalities reported.

Crews are currently battling a large fire after a natural gas line exploded at a commercial building in Nashua, New Hampshire.

On October 10, 2025, an explosion occurred at an Accurate Energetic Systems manufacturing plant in Humphreys County, Tennessee, United States, causing sixteen fatalities and at least four injuries.

Ice may have damaged a gas line, causing a Nashua, New Hampshire explosion. Now the fire department is issuing a warning about ice on roofs.
