Who is fengyutech?

FENGYUTECH specializes in Biomass Gasification, MSW Gasification, and Urban Waste to Energy solutions, offering cutting-edge Industrial Oil Purification and SF6 Gas Recovery Equipment. We're committed to transforming waste into sustainable energy, driving innovation for a greener future

What is Fengyu biomass gasification?

FENGYU leads the way in innovative biomass gasification systems, utilizing a variety of feedstocks like wood chips, rice husks, sawdust, corn stalks, and coconut shells to produce clean, sustainable energy.

What does Fengyu do?

Fengyu is dedicated to providing clean and renewable energy solutions to the world. Our mission is to make renewable energy accessible to all people and communities. Take a look at our global project gallery below to see where we've made a difference. #169; 2035 by MCR Construction. Powered and secured by Wix

How does Fengyu insulating oil purification work?

FENGYU's insulating oil purification technology helps extend the lifespan of transformers by removing moisture, gas, and impurities from transformer oil. Our solutions are designed to maintain the integrity of transformer insulation, reduce equipment downtime, and enhance the reliability of power supply.

Meet your diverse power needs with a fengyu biomass generator at Alibaba . Browse gas turbine generators to meet your exact requirements at reasonable price points

The engines and generator, electrical equipments should be put indoors, and other equipments could be put outdoors. The construction area for each 200kw generator set is approximate 40~50m2. The self ...

Founded in 1985, Chongqing Fengyu Electric Equipment Company Limited is a global leader in the production of biomass gasification equipment, gas generator set, oil filtration and purification equipment.

Main products biomass gasifier, biomass gasification power generation equipment and 670 more Products from Chongqing Fengyu Electric Equipment Co., Ltd. on Alibaba

FENGYU leads the way in innovative biomass gasification systems, utilizing a variety of feedstocks like wood chips, rice husks, sawdust, corn stalks, and coconut shells to produce clean, sustainable energy.
