Which telco has the largest 5G network in France?

To know more: Having deployed France's largest 5G network by number of base stations, Free is today announcing that it has become the country's first telco to offer 5G 3.5 GHz SA (Standalone Access) on its public network on a national scale.

What is a 5G tower?

Generally, 5G infrastructure is defined as small and macro-cell base stations with edge computing capabilities - which requires significant amounts of fibre. Mobile 5G towers are therefore becoming a familiar sight across our cities. But what is a 5G tower, and what is the impact it has on the environment? What are 5G towers and how do they work?

What is 5G infrastructure & why is it important?

This will provide a huge impetus for the worldwide 5G infrastructure market. Generally, 5G infrastructure is defined as small and macro-cell base stations with edge computing capabilities - which requires significant amounts of fibre. Mobile 5G towers are therefore becoming a familiar sight across our cities.

Does free have 5G in France?

Available in almost 10,500 municipalities, it already covers nearly 95% of the French population. Today, Free is announcing that it has deployed 5G SA (Standalone Access) on the 3.5 GHz frequencies of its public network on a national scale. By doing this, it has become the first mobile operator in France to offer this technology to its subscribers.

Explore an in-depth analysis of 5G regulation and law in France, covering deployment, spectrum licensing, and future 6G initiatives. Discover more now!
