Tesla (TSLA) has secured a massive new Megapack order that will power France's new largest energy storage system.

TagEnergy, in partnership with Tesla, has officially begun construction on France's largest battery energy storage system (BESS) in Cernay-l&#232;s-Reims, located in the department of Marne .

The 100-megawatt Chevir&#233; battery project in the western city of Nantes will use Tesla Inc.'s Megapack product and be able to power 170,000 homes for two hours, the company said.

TAGENERGY, a global leader in low-carbon energy solutions, launches construction of France's largest battery energy storage platform (France, Marne). This landmark project marks the ...

Cernay-l&#232;s-Reims, France - TagEnergy is set to construct France's largest battery energy storage system (BESS) in Cernay-l&#232;s-Reims. The 240MW/480MWh project will be five times larger ...

We develop and operate modular energy storage systems using long-life Lithium Iron Phosphate (LiFePO4) batteries, supported by a proprietary Battery Management System (BMS). ...

The Chevir&#233; project, which will use advanced technology from Tesla Megapack, represents a significant breakthrough for the country's energy sector, being the first large-scale ...

Leading battery storage developer Harmony Energy is set to deliver France's largest battery energy storage system (BESS)--the Chevir&#233; battery project - using Tesla Megapack ...
