Georgia Power announced today that it has started construction on a new 200-megawatt (MW) battery energy storage system (BESS) in Twiggs County, southeast of Macon, Ga. [Read More](#)

Georgia Power is enhancing grid reliability and sustainability through Battery Energy Storage Systems (BESS), supporting clean, safe, and affordable energy for 2.8 million customers ...

Georgia has emerged as a major hub within this burgeoning domestic supply chain, particularly for the electric mobility sector, which shares technological and manufacturing synergies ...

Discover reliable battery energy storage systems in Georgia. Save energy, cut costs, and ensure backup during grid failures or outages.

From coal plant conversions to solar co-location, Georgia Power's battery strategy highlights the evolving role of storage in utility-scale energy planning.

Georgia Power is strategically placing these storage systems next to existing substations and repurposing retired coal sites to optimize project development and minimize costs.

As a part of an All-Source Request for Proposals (RFP), Georgia Power is currently seeking approval from the Georgia PSC of 10 new BESS facilities with a total capacity of 3,022.5 MW ...

As of late 2025, Georgia hosts approximately 146 MW of operational battery energy storage capacity, with another nearly 4,000 MW under construction, approved, or in development across its utility ...
