---

Our utility-scale energy storage seamlessly integrates with critical energy systems, driving revenue with optimised assets and delivering proven reliability, flexibility, and safety. We have over 19 GWh of ...

German solar and battery storage specialist Tauber Energy GmbH has commissioned a 10-MW/22-MWh battery energy storage system in the town of Waltershausen, Germany.

In March 2025, Germany's largest battery storage system - located in Bollingstedt, Schleswig-Holstein - was connected to the grid. It delivers 103.5 megawatts of power and has an ...

We deliver a complete, intelligently networked system - featuring power electronics manufactured in-house in Bocholt (Germany), high-performance batteries selected to match your project, integrated ...

As standalone operational units and due to their modular design, they can easily be replaced in case of failure, ensuring reliable operation with the highest availability of your batteries.

Lithium-ion OEM Envision Energy has launched its latest grid-scale BESS solution, a 10-foot modular DC block which can be combined into configurations of 12MWh or more.

Impact: In addition to financial returns, large battery projects also generate immaterial returns, as these storage systems accelerate the energy transition and contribute to reducing CO2 emissions.

By combining high capacity cells with a logistics-friendly 10-foot modular unit, Envision's GEN 8 supports 6 MWh, 8 MWh, 10 MWh, 12 MWh and potentially larger configurations per unit.
