This plant, projected to begin operations in 2026, will position AES El Salvador as one of the companies with the highest installed solar generation capacity in the country.

The continued expansion of solar and wind energy, with new projects being developed and existing ones expanded, is expected to generate approximately 3,000 gigawatt-hours (GWh) of ...

With these additions, national photovoltaic plants currently produce 539.07 gigawatt hours (GWh), which represents 7.31 % of the national matrix, while in 2017 only 94.8 GWh were ...

The portfolio includes two solar parks in La Unión with 50 MW and 100 MW, respectively. Also a 100 MW farm in San Vicente, one of 50 MW in La Libertad and another of 50 MW in ...

El Salvador has experienced a remarkable 160-fold increase in solar energy generation capacity from 2015 to 2023, according to data from the Latin American Energy Organization (Olade).

The new solar plant will benefit more than 2 million users across the national power grid and is expected to reduce approximately 20,000 tons of CO2 emissions per year, supporting a ...

Located in Western Australia, this 70GW project by InterContinental Energy and CWP Global will generate 200TWh annually -- nearly 73% of Australia's 2023 power output. It will feature ...

Four new solar projects are currently in development. According to data from the Regional Electricity Operator (EOR), four solar projects are under development in different parts of El ...
