Bridge the power supply gap with Infineon's total solutions for online and offline uninterruptible power supplies (UPS) systems.

It automatically selects between two input ranges of 85 to 140 VAC and 170 to 280 VAC, while accepting any frequency from 45 to 450 Hz, and provides 115 VAC, 60 Hz output power.

When at or below 50-75 percent capacity, the 9395 high performance uninterruptible power modules (UPMs) automatically act as N+1 redundant systems, saving the cost and space required for ...

MEGALINE UPS is a single phase uninterruptible power supply with high frequency PWM technology, On Line Double Conversion type, modular architecture, with the possibility of N+X redundant ...

Huawei UPS5000-H is a high-efficiency modular UPS solution delivering scalable, reliable power protection and optimized energy efficiency for critical infrastructure.

The High-Frequency Inverter is mainly used today in uninterruptible power supply systems, AC motor drives, induction heating and renewable energy source systems.

These systems ensure reliable voltage supply by providing a filter function in addition to compensating for short-term power outages from the grid.

The EH5000 series is a new generation of high-frequency online UPS developed with advanced DSP digitization control technology, which effectively improves product performance and system reliability, ...
