Duke announced it has purchased SolarWorld's twin Desert Star Solar Projects, to be renamed Highlander Solar 1 and 2, expanding the company's solar generation capacity to over 100 megawatts.

Power plant details for Highlander Solar Energy Station 1, a solar farm located in Lake Wilderness, VA. View the monthly generation and consumption, generator details, and more for Highlander Solar ...

Station (165MW), and Richmond Spider Solar (20MW). They will earn cashflows under seven 15-year offtake contracts settled at the PJM Dominion Hub with offtakers for energy, renewabl.

The solar facility has all single axis tracking solar panels that follow the sun for maximum solar output. The solar power generated by Spotsylvania Solar is estimated to power 111,000 homes at peak ...

Highlander Solar Energy Station 1 is a solar power plant with 165 MW of capacity located in Spotsylvania, VA. The facility is currently operational and generating electricity. It is connected to the ...

The twin projects, named Highlander Solar 1 and 2, are in close proximity and will be run as a single operation. It will collectively generate 21 megawatts (MW) of renewable energy, enough to power ...

Data-driven study/optimization of a solar power and cooling generation system in a transient operation mode and proposing a novel multi-turbine modification concept to ...

To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global ...
