Breaking down major changes to federal solar tax credits in 2026 and how homeowners can still access federal incentives through third-party ownership.

Starting January 1, 2026, the residential solar tax credit disappears completely for customer-owned systems. Third-party owned systems (leases and PPAs) continue to qualify, with ...

Two tax credits, the investment tax credit (ITC) and the production tax credit (PTC), directly support investment in wind and solar electric power. In the Congressional Budget Office's baseline ...

With a host of tax and incentive programs, there are many reasons for taxpayers to install solar power generation systems. The tax benefits can include income tax credits, breaks on ...

When you purchase (not lease) new solar-powered equipment that generates electricity or heats water, or purchase solar power storage equipment, you generally can claim the Residential ...

Next year, if you put solar panels on your house, you will have to pay the full price and won't get a tax credit. Before, a \$30,000 solar system effectively cost \$21,000 after considering...

The federal solar investment tax credit (ITC) allows for a deduction of 26% of the installation costs for residential and commercial solar systems until the end of 2022, and this rate is ...

The federal solar energy tax credit--formally the Residential Clean Energy Credit for homeowners and the Investment Tax Credit for businesses--lets you slice 30 % off the price of ...
