Renewable Energy Progress Tracker Explore electricity, heat and renewable fuels data from Renewables 2025 and renewables ambitions by 2030

This web map will allow you to explore global power plants and U.S. renewable energy facilities using text search and map visualization tools.

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

Solar Resource Maps and Data Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. Solar Supply ...

Users can log in to these portals to view a treasure trove of information about their solar energy systems, including daily, weekly, and monthly energy generation statistics, efficiency metrics, ...

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for ...

Enter a state, county, city, or zip code to see a solar estimate for the area, based on the amount of usable sunlight and roof space.

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this ...
