The Dominican Republic has launched a tender for up to 600 MW of solar and wind capacity, requiring projects to include at least four hours of battery storage to support stability in the...

The Dominican Republic is on the verge of a significant shift in its energy sector, with the Minister of Energy and Mines, Antonio Almonte, revealing plans to introduce new regulations for the ...

The facility, consisting of three solar farms, will generate 286 GWh of electricity annually, enough to power around 166,000 households. It is now the largest photovoltaic installation in Central ...

The Dominican Republic's national energy commission has approved a new 83.4-MW/101.6-MWp solar project with storage, as well as inaugurated a 58.48-MW/64.70-MWp solar ...

HUAWEI FusionSolar advocates green power generation and reduces carbon emissions. It provides smart PV solutions for residential, commercial, industrial, utility scale, energy storage systems, and ...

Join Smart Energy, Huawei Digital Power, and DOMLEC as we unpack the technical journey, lessons learned, and practical insights from this landmark project.

As one of the core equipment of the photovoltaic power generation system, benefiting from the rapid development of the global photovoltaic industry, the energy storage inverter industry has maintained ...

Advanced microinverters and power optimizers now maximize energy harvest from each panel, increasing system output by 25% compared to traditional string inverters. Smart monitoring systems ...
