Safety is the foundation of every large-scale energy storage system. This video provides a deep dive into Huawei Smart String ESS fire safety design, including: ...more

Huawei's Smart String Grid-Forming ESS sets a new standard for safety with its refined protection features. With innovative active pack-level thermal runaway non-diffusion technology, it delivers ...

Huawei Digital Power has successfully passed a stringent ignition test for its C& I GFM ESS, demonstrating exceptional safety standards in energy storage technology.

It focuses on real-world worst-case scenarios, emphasizing the importance of testing under conditions that could lead to thermal runaway without any suppression measures. Huawei's ...

A new energy storage system just passed an unprecedented fire test, raising safety standards and building trust in the technology powering our future.

The Chinese manufacturer subjected its Smart String & Grid Forming ESS to thermal runaway and reported delayed fire ignition for seven hours, even as the number of impacted cells ...

This invention introduces an innovative approach to enhancing the safety of energy storage systems, especially against fire risks.

Huawei Digital Power has achieved a significant milestone with its Commercial and Industrial Hybrid Cooling Grid Forming Energy Storage System (C& I GFM ESS) successfully passing ...
