The Huawei LUNA2000-2.0MWH-2H1 battery storage system sets new standards with a fixed capacity of 2.0 MWh and enables full charging and discharging of up to 2 MW in two hours.

It offers a wide range of applications, such as maximising self-consumption, grid support and auxiliary services to avoid grid expansion costs, load control or reducing peak loads through time-of-use policies.

The launch time of the FE communication version is to be determined. Please confirm with your local product manager of Huawei for information about the final version.

With the application of optimizers and the smart string energy storage system, the solution can improve energy yield by 30% and energy storage power by up to 15%. ...

PV Guided Tours: The system supplies three-phase backup power and utilises an intelligent EMS. The focus is clearly on safety and efficiency - including for the new, hybrid-cooled ...

Huawei says its new, all-in-one storage solution for residential PV comes in three versions with one, two, or three battery modules, offering 6.9 kWh to 20.7 kWh of usable energy.

*7 Storage system is ordered and delivered in the form of power module and battery module separately with corresponding quantity. Disclaimer: the preceding values are measured by ...

Huawei's energy storage technologies extend battery life, ensure safe operation and simplify maintenance and servicing (O& M) through precise management of battery cells, packs and ...
