While some renewable energy projects have benefited from blended finance and concessional support, grid and transmission projects typically receive less attention.

W&#228;rtil&#228; has delivered a number of projects in the region, including Singa-pore's first-ever pilot grid-scale battery energy storage system (BESS) and several large-scale projects in the Philippines, building on ...

Summary: Explore how ASEAN energy storage systems are transforming renewable energy integration and grid stability across Southeast Asia. Discover market trends, real-world applications, and ...

In response to these needs, Toyota launched a development and demonstration project in Japan in May 2023 to utilize electrified vehicle batteries as stationary energy storage, working in ...

Recent industry data indicates that ASEAN's demand for grid-scale and commercial storage continues to rise, driven by structural energy shifts, policy momentum, and fast-growing ...

This paper explores the role of BESS in the ASEAN energy landscape, examining current trends, benefits, challenges, and the pathway towards optimising its potential across the region.

Vietnam needs to issue policies to encourage and manage Battery Energy Storage Systems (BESS) for renewable projects to ensure a stable power supply, a foreign expert has advised.

This study investigates the economics of using hydrogen to store renewable energy and subsequently consumed by downstream applications in ASEAN and East Asian countries.
